

Ranking methodology 2025

Gender equal	Transparent	For all
Top women, men and mixed category team members get the same amount of points	The maths are not that easy but you get a chance to read how it works	Whether you are first or last, you will get points to brag about

Races are not treated equally.

Winners of each category (Women, Men and Mixed) of the Ötillö World Championship get 800 points.

Ötillö World Series races get 600 basic or “B” points.

Winners of Cote Vermeille, Rockman and Troll Enez get 500 B points.

Winners of all other races get 400 B points.

Then we look at the total number of finishers in 2025 and multiply this by 2/3 and round that up. If that number is higher than 200, we cap it to 200. Let’s call it P.

The winners of each category get the sum of the B points and the P points.

Example: B is 400. There are 90 finisher teams in 2025, so P is 60. The winners of each category get 400 + 60 = 460 points.

The points are then distributed against a cubic curve (x^3 function) so that the winners of each category get the maximum points and the last finishers of each category get 0.

Let us take an example:

If the basic number of points was 400 for a specific race. And there was 30 finishers in the women category. Below is the parabolic distribution of points. Ranking in grey corresponds to points in white i.e. the 1st Womens team gets 420 points, the 8th 184 points, etc.

Rk	Pts	Rk	Pts
1	420	16	48
2	379	17	38
3	339	18	30
4	303	19	23
5	270	20	18
6	239	21	13
7	210	22	9
8	184	23	6
9	160	24	4
10	138	25	3
11	119	26	2
12	101	27	1
13	85	28	1
14	71	29	1
15	59	30	0

Finally, to calculate the number of points during the season, you add up your 5 best results for individuals and your 4 best results for teams.
